

Use-Case Flow Document

Use Case: Book Center Slot. **Preconditions:** The Citizen Registrant is logged in and has completed demographic registration. **Postconditions:** A vaccination slot is reserved, and the center's availability is updated.

Main Success Scenario:

1. The Citizen Registrant selects "Book Vaccination Slot" from the dashboard.
2. The system fetches and displays a list of available vaccination centers and dates.
3. The Citizen Registrant selects a preferred center, date, and time slot.
4. The system triggers the <<include>> "Enforce Dose Interval" check to ensure eligibility.
5. The system confirms eligibility and locks the slot.
6. The system displays a booking confirmation screen.

Alternate Flow (Dose Interval Rule Failed):

1. The system detects the minimum interval (e.g., 28 days) has not passed.
2. The system blocks the booking and displays an error message stating the earliest eligible date.
3. The user is returned to the dashboard.
